

LEED 2009 for Existing Buildings: Operations & Maintenance

EA CREDIT 6: EMISSIONS REDUCTION REPORTING

Project # 1000020447 Capitol Center

All fields and uploads are required unless otherwise noted.

THRESHOLD ATTEMPTED

Points Attempted: 1

ALL OPTIONS

Performance period start: Jun 1, 2011

Performance period end: Jun 30, 2012

Provide a summary of actions relating to energy efficiency, renewable energy, and other building energy emissions reductions measures, including reductions from the purchase of renewable energy credits, and estimate the relative contribution of each action.

Condensed water reset - 10.78 metric tons of CO2 equivalent / year
Chilled water reset - 15.53 metric tons of CO2 equivalent / year
AHU coil cleaning - 13.00 metric tons of CO2 equivalent / year
Tower optimum start stop - 107.85 metric tons of CO2 equivalent / year

Total annual greenhouse gas emissions generated: 2,650 tons of CO2 equivalent per year

Select one of the following emissions reduction strategies:

- ☒ Emissions are reported through formal participation in a third-party voluntary reporting or certification program.
- ☐ Emissions are reported independently using a technically sound reporting protocol.

EMISSIONS REPORTED THROUGH THIRD PARTY PROGRAM

- ☒ Through formal participation in a technically sound third party voluntary reporting or certification program, greenhouse gas emissions generated by the project building and associated grounds during the performance period were tracked, recorded and reported. Those emissions include, at a minimum, greenhouse gas emissions resulting from energy consumption in the project building and on the associated grounds.

Upload EAc6-1. Provide the formal recognition or certification documents generated by the program acknowledging successful reporting and verification under their specified protocols. The documents must identify the project building and quantify its annual greenhouse gas emissions.

Upload

Files: 1

Describe the independent third-party program and background information as necessary to demonstrate the technical soundness of the program. Alternatively, provide existing prepared literature on the program in the optional upload area below.

ADDITIONAL DETAILS

- ☐ Special circumstances preclude documentation of credit compliance with the submittal requirements outlined in this form.
- ☐ The project team is using an alternative compliance approach in lieu of standard submittal paths.
