

Unit of measure
NOTE: Units must

Metric represen

Be sure to include an appropriate unit of measurement in either weight or volume (SF is not acceptable)

Tons

Weight

Table MRc6-1. Building Baseline Waste Stream Audit

Enter data from the project building waste stream audit in the table below, including landfill, incineration and diversion volumes/weights.

Waste Type	Weight in Waste Stream (Tons)	Percentage of Total Waste Stream	Waste Diverted (Tons)	Percentage of Waste Type Currently Diverted from Waste Stream
Metal	0.01	0.5	0.01	100
Mixed Paper	0.29	14.5	0	0
Cardboard	0.13	6.5	0.13	100
Glass	0.01	0.5	0	0
Plastics	0.03	1.5	0	0
Wet Waste	0.51	25.5		
Bulk (metal)	1.02	51		
Total:	2			

Add Row

Delete Row

Fill in the results of the waste audit. Remember, this credit is earned simply by performing the waste audit. Compliance is not dependent on diverting a certain percentage of waste.

Upload MRc6-1. Provide a summary of the waste stream audit report that includes:

1. Description of the audit procedure;
2. Description of waste audit samples and the timing of the audit;
3. Rationale demonstrating that the audited sample is representative of the building's typical waste stream.

☒ The audit procedure included physical sorting and measurement (of waste type found in the building's waste stream during the audit period.

Describe the opportunities identified for improved waste diversion practices

See uploaded Waste Audit Report

See the LEEDuser Waste Stream Audit Report template. This report should confirm that (1) waste was physically sorted, (2) the audit period meets the credit criteria, and (3) that all waste from the building was audited.

Check this! Waste must physically be sorted and measured for this credit. This checkbox confirms this.

Select one of the following:

- ☒ **Whole Building:** The scope of the waste data provided includes waste generated throughout the entire project building and for the associated grounds.
- ☐ **Exempting Floor Area:** The scope of the waste data provided includes all the grounds, and the project team is exempting up to 10% gross floor area for this credit.

Summarize the opportunities that were identified from the waste audit here, or you can include them in the waste audit report.
