

Bronze level certification does not contribute to compliance

Environmental Attributes

- Product Category — Seating: Task/ Work Chairs
- Certifications —
 - Cradle to Cradle Certified™ – Bronze v3.1 (depending on fabric)
 - SCS Indoor Advantage™ and Indoor Advantage™ Gold certified for indoor air quality in North America
 - level® 3 certified to ANSI/BIFMA e3 Furniture Sustainability Standard
- LEED Contribution —
 - Recycled content
 - Regional materials
 - Rapidly renewable materials
 - Low emitting materials
 - Innovation in design
 - Sustainable purchasing
- Environmental Facts —
 - 95% recyclable
 - 28% recycled content

The chair might comply with the low emissions of VOCs criteria. However, this document does not confirm if it complies with Section 7.6.1 (valued at 50% cost) or Section 7.6.2 (valued at 100% cost) of the ANSI/BIFMA e3-2011 Furniture Sustainability Standard. Additional research would be needed to confirm the contribution.

Recycled Content Summary

Model	Total Weight (lbs)	Recycled Content (lbs and %)		Post-Consumer (lbs and %)		Pre-Consumer (lbs and %)		Recyclability (lbs and %)	
Standard Base	35.3	9.7	28%	6.3	18%	3.5	10%	33.7	95%

The contribution for recycled content is based on cost. For example, if the chair costs \$800, the contributing value for post-consumer recycled content is $\$800 \times 0.18 = \144 . The contributing value for pre-consumer recycled is $(\$800 \times 0.10)/2 = \40 (this is because pre-consumer content counts for half). The total contributing value for recycled content is $\$144 + \$40 = \$184$.

content are based on data provided by ranges or other broadly based information. Provide the most accurate recycled content may result in higher or lower content. This notice.
