

### Sample utility tariff charges

As noted here, the electricity costs change over the course of year as demand changes. Option 1 requires percentage savings in energy costs that will be different than actual energy usage.

June thru September demand charge	\$15.3520	\$20.341
October thru May demand charge	\$11.2720	\$14.935
consumption charge	\$0.0826	\$0.1094
After hours	\$0.0440	\$0.0583
gas	0.28775	\$0.3050
	0.20094	\$0.2130
	0.96632	\$1.2804
